Manufacturer: ACE Packaging
Tramstraat 4
8560 Wevelgem - Belgium

Test: Determination of the overall migration as recorded in the European Regulation No 1935/2004 and the Belgian Legislation RD 11/05/1992 and amendments.

Simulants and test conditions selected following the European Regulation No 10/2011 and amendments. Analyses effectuated conform EN 1186-1, EN 1186-13 and EN 14338.

used simulants:
simulant E: Modified Polyphenylene Oxide

test conditions:
contact duration: 10 days
contact temperature: 40°C
contact method: food contact side

Test results: overall migration:
< 10 mg/dm² for each used simulant

The maximum limit for the overall migration is 10 mg/dm² or 60 mg/kg foodstuffs.

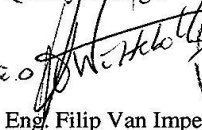

The results show that the delivered tested samples are suitable for long term contact with all dry and fatty foodstuffs at room temperature or below.

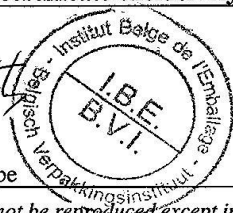

The complete description of the presented material, the results and findings of the tests are given in the report CFP-14.111 of the 27/08/2014 which is inextricable to this certificate.

Any change of the presented material involves a new series of conformity tests on the modified material.

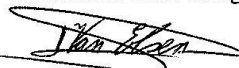

The report and certificate exclusively refers to the tested objects.
